PRESS RELEASE

**New Students Need to Start the Enrollment Process Now
for Lake-Sumter Community College's Spring Term**

LEESBURG (Nov. 4, 2009) - Lake-Sumter Community College's spring term begins January 6, 2010. New students need to apply and complete the enrollment steps prior to registering. Open registration for new students begins on November 16. The earlier students register, the better the choice of classes and schedules, so it is important to visit one of LSCC three campuses or go online at www.lsc.edu to complete the application. Enrollment steps and the schedule of spring term classes also are available online.

Not all students want to transfer to universities, but are more interested in preparing for in-demand careers. LSCC's two year Associate in Applied Science degrees provide workplace education in business, computer technology, criminal justice, early childhood education, electrical distribution (lineman), fire science, graphic design, health information management and office administration.

One-year technical certificates give students a competitive edge in today's competitive job market or enhance current careers. Courses are offered in accounting, computer programming, electrical distribution (lineman), information technology analysis, medical information coder/biller, medical office management, office management and small business management.

To learn more about these and LSCC's two-year Associate in Arts and Associate in Science degree programs, link onto the Catalog located under the homepage's "Future Students" tab or call 352-787-3747; 352-568-0001 in Sumter County.
