

Preliminary QEP Topics

“Guiding Students to Succeed in College”

- This project might do things such as create a mentoring program for students, enhance student advising services, or provide special resources for first-time-in-college students, first-generation students, and non-traditional students.

“Launching Student Technology Into the Future”

- The project might do things such as expand and enhance distance learning opportunities for students, increase the quality of communication with students in the college environment, or expose students to a broader range of e-Learning resources.

“Developing Learning Partnerships for Students”

- This project might do things that will create frameworks for better cooperation and collaboration with our public school partners through faculty forums, our partners in workforce and career development through greater opportunities for student training and internships, or in our community through service learning opportunities.

“Quality Teaching Resources for Better Student Learning”

- This project might do things such as providing new opportunities for training for our instructors, opportunities for adjuncts and newly hired faculty to find mentoring and advancement tools, or the integration of new and creative teaching strategies throughout the curriculum.

“Building a Solid Foundation in Math and Communication Skills for Students”

- This project might focus attention on building and enhancing basic skills for students such as enhanced math tutoring and practice resources, increased emphasis on reading and comprehension, or speaking and writing competence.
